

Baglt

By Ashley Lerma, Dre Lajara, Jordan Neill and Kevin Holder

As a Shopper

I want to keep an ongoing grocery list

So that I can shop efficiently

Tools

- React
- Bootstrap React
- Auth0
- Sequelize
- Node js
- Express

Demo

Directions for Future Development

- Create a favorites page to store frequently purchased items.
- Move shopped items to the bottom of the page.
- Pull prices from external API to get total.

Lessons Learned

- Working around scheduling conflicts is challenging.
- There are a hundred right ways to do things and sometimes you just need to pick one and go with it.
- Don't be afraid to ask for help.
